

Resources for Kids From Sam Robertson

I searched earlier this year and even order a couple of things that sounded good but they were not “categorized” well, sounded like intended for a younger group but was for older. I have only scanned these, has water cycle, Noah’s animals, pollution, food, soil—the 2nd one heavier on use of scripture with lessons. Brief description of these at:

<http://www.rpinet.com/seco.html>

One is for 9-11 yr olds:

“Loving Our Neighbor The Earth”, Christie L. Jenkins, PhD, Resource Publications, Inc, San Jose, CA—1991--17 lessons, 112 pages

One is for 12-15 year olds:

“Your Will Be Done On Earth”—same author—1993-18 lessons , 112 pages

Also have one copy of “Squinty Flinty” –Mike Roden—Illustrated by a middle school class--we gave out at Convention—from TN Valley RC&D—8 pages- frog searching for a home—but encountering potential new home sites that are polluted—could be copied—used as a color book exercise by probably 3 to 8 year olds

Earth Ministry has some stuff, but most needs to be ordered.

http://www.earthministry.org/curricular_aids_cong_resources.htm#Resources%20for%20Children%20and%20Youth

This seems good but have to order from:

<http://www.acpe.lake.k12.ca.us/>

The best I’ve found that can be downloaded and printed is at the EPA kids site:

<http://www.epa.gov/kids/water.htm>
